A. Usability of the digital learning platform

### I think the digital learning platform was easy to use

8 responses

I felt confident when using the digital learning platform
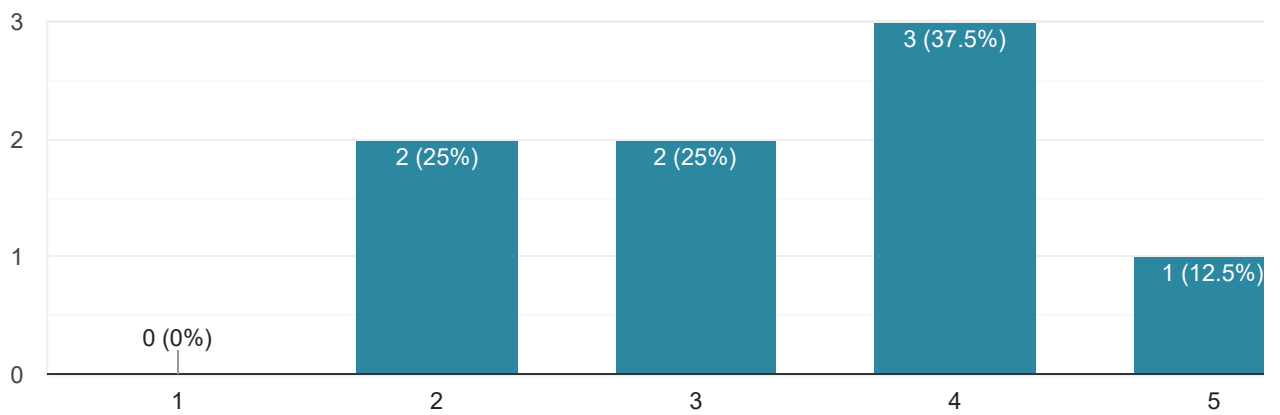

8 responses

I had to learn a lot before I could start using the digital learning platform
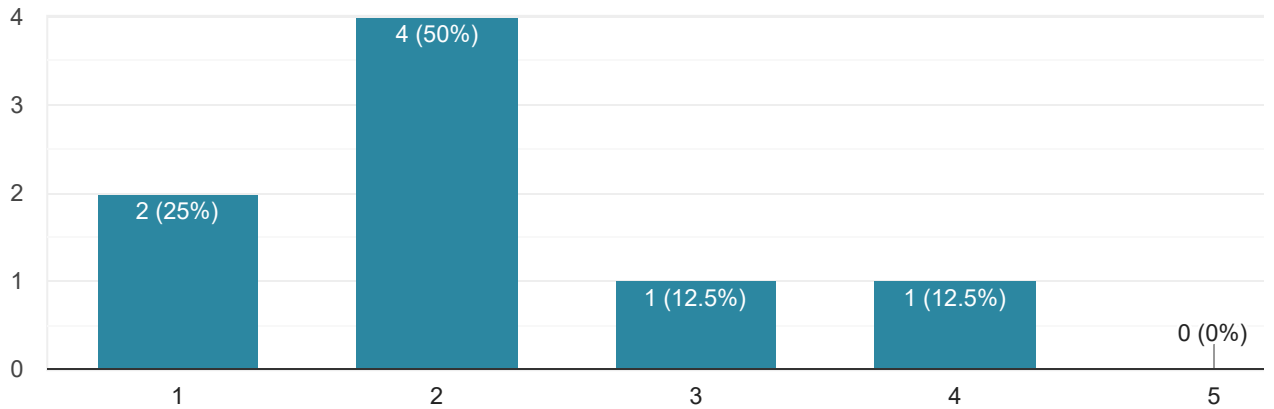

8 responses

I believe that the digital learning platform is easy to use for other people without help or manual

8 responses

## I find the digital learning platform very difficult to use

8 responses

I find the digital learning platform unnecessarily complicated

8 responses

I find that the digital learning platform contains many inconsistencies (= lack of coherence and coherence)

8 responses
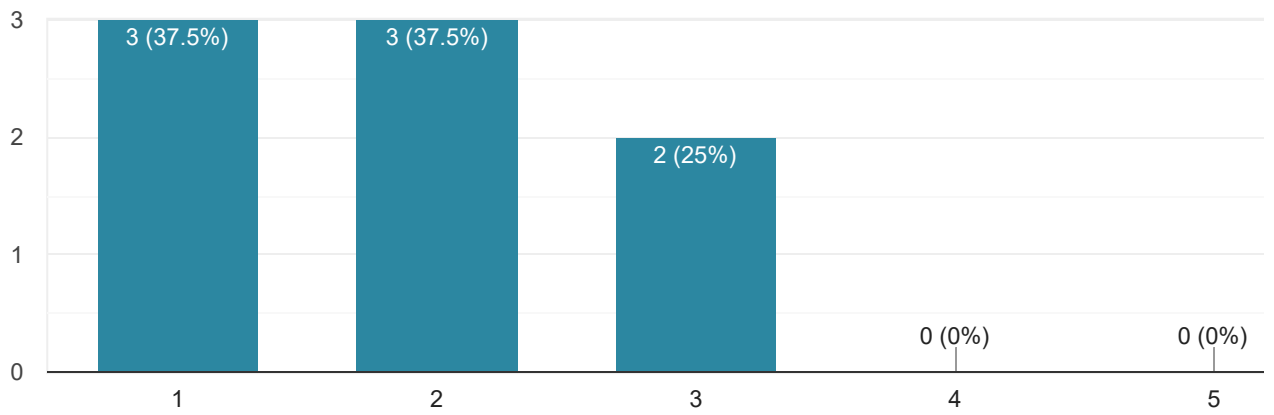

I find that the different functions in the digital learning platform are well integrated

8 responses
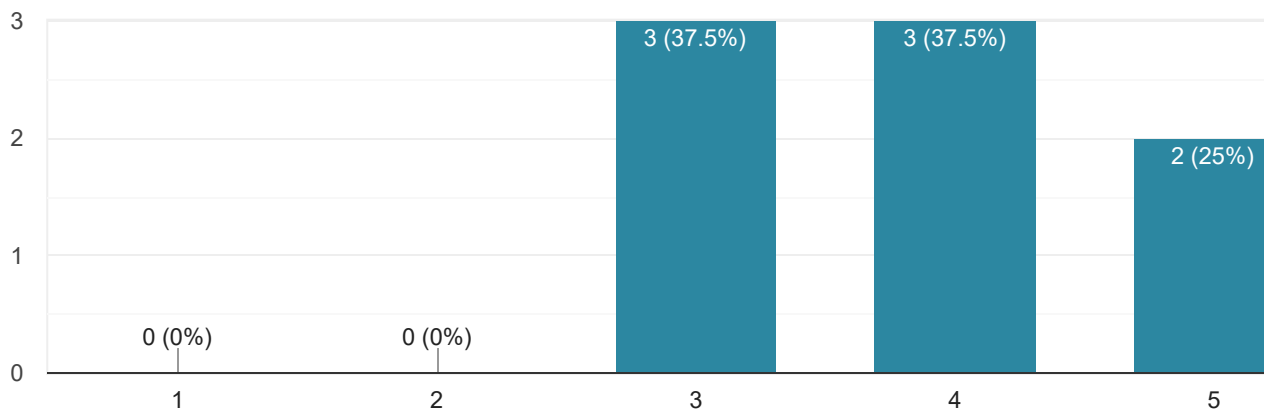

I find switching menus on the digital learning platform easy

8 responses
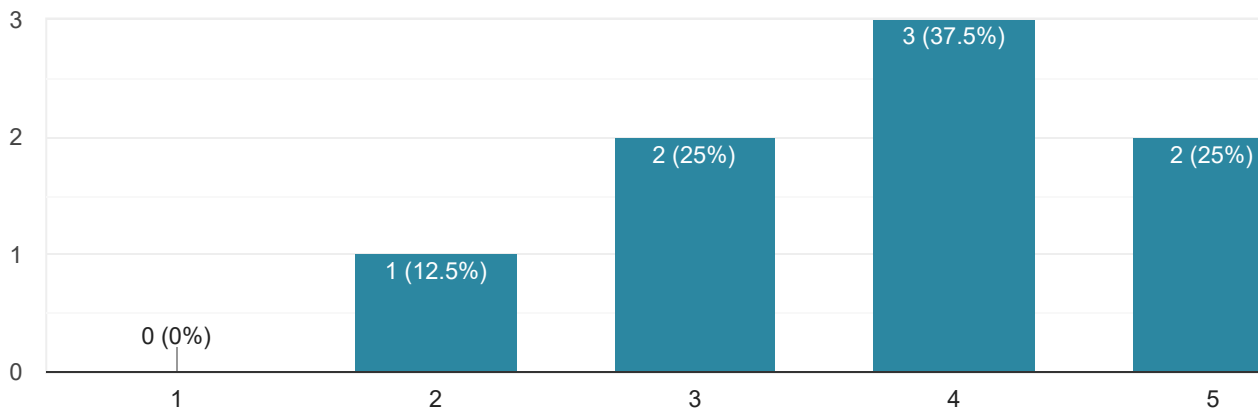

I believe that the digital learning platform supports the learning process

8 responses

I believe that the digital learning platform is well adapted to the learning approach of Career 4.0

8 responses

I believe that the digital learning platform contains all the necessary functions for a successful learning process

8 responses

I think I would often use the digital learning platform

8 responses

Where do you see resistances with regard to using the learning platform to solve tasks together with mentees, mentors and experts, to work on the personal development plan and to learn independently?
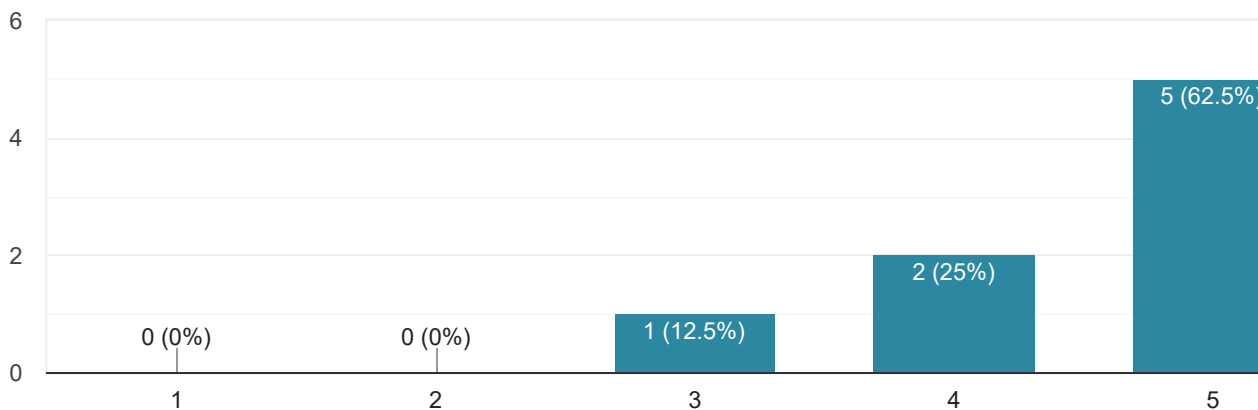

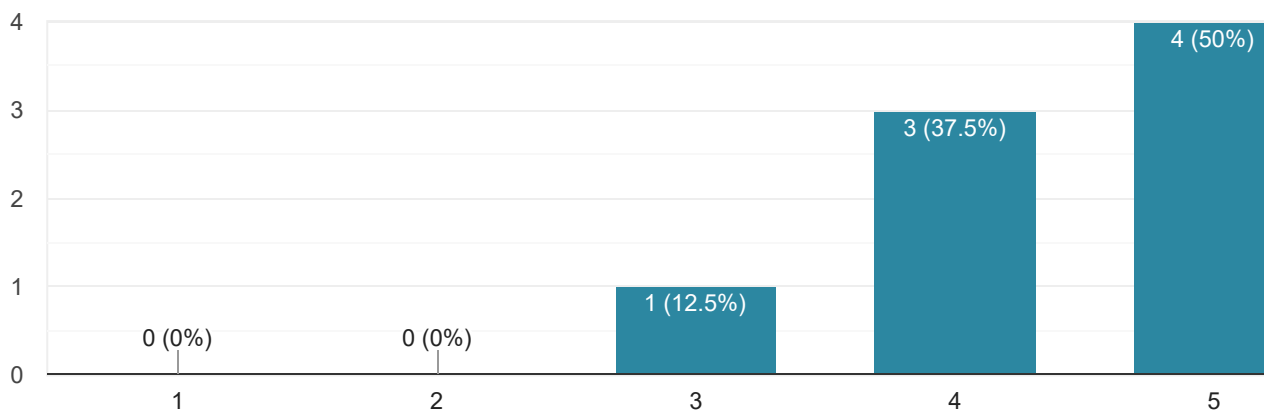

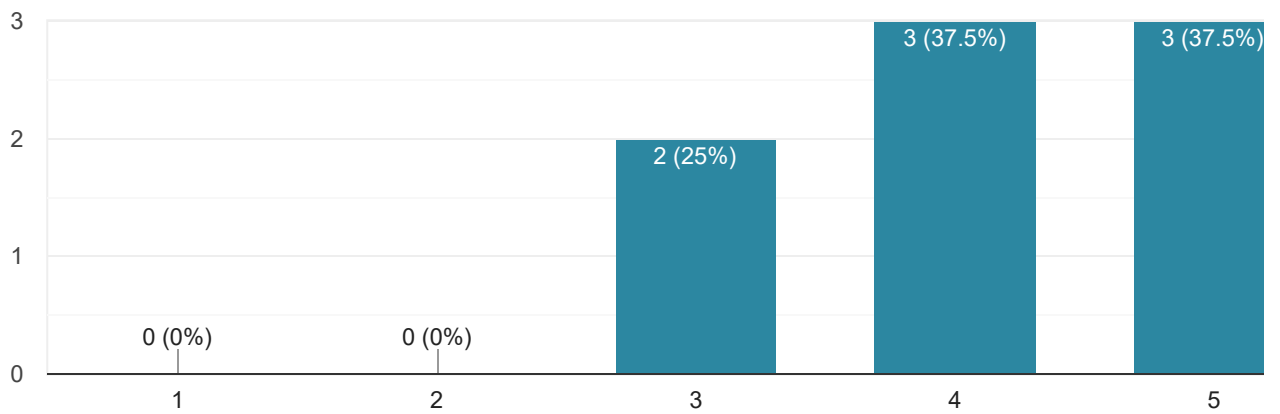

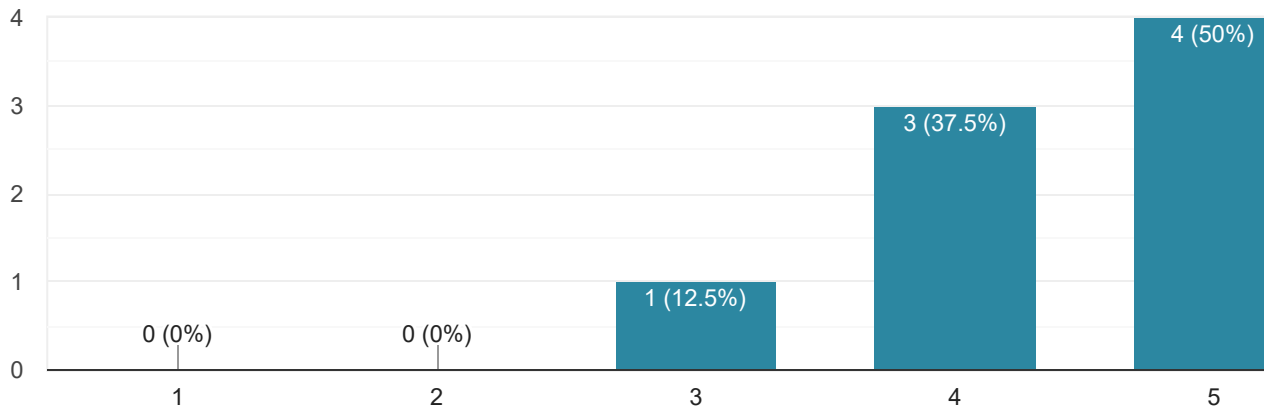

6 responses

the automatic opening of Tabs with each movement on the platform, the difficulty of separating between Friends and members

1. Nobody, everything went smoothly. 2. I do not know. 3. I do not know

I think there are no deterrents. I was not familiar with this digital platform and did not take the time to get acquainted.

Having "friends" is of no use somewhere since everyone can communicate with everyone.

Time Limits and Professional Obligations.

1. There are many tools for collaboration so it is complete. Maybe sometimes it gets stuck and that does not help the learning climate. 2: Mentee did not see any tools to make his own personal development plan / I will evaluate it in the next phase. How does he make his own **PDP**? (the same goes for 3). In 3 I should add that the structure of the material is extremely placed but it lacks interactivity, it has almost only pdf. I recommend h5p to be integrated as a plug in on the platform

Where do you see potentials for using the learning platform to solve tasks together with mentees, mentors and experts, to work on the personal development plan and to learn independently?

6 responses

ease of uploading of documents, ease of reading and downloading of documents

Based on the exercise we did yesterday, the good communication through the platform allowed the smooth completion of the exercise and the cooperation of the team members.

The most important reinforcing factor, I believe, is working with those who are quite familiar, as they have the ability to guide us.

The groups, the function of video conferencing and sending personal messages.

Personal and professional development. Completion and development of thoughts and beliefs into practice.

1: staying on the platform for the session and not using another zoom platform. At one point everything happens.

What specific suggestions do you have for improving the digital learning platform? {Please give as short answers as possible.)

5 responses

improving the platform based on the above

It takes more time to use the platform to have specific suggestions

In the menu I think it should be able to choose the working language.

Color changes for emphasis and add captions for beginners, fix remember me, add list of mentees with elements like LinkedIn for networking. Add chat rooms for more direct communication especially of mentees.

1. When you enter the docs there is no back button 2. In the meet in the test I did the image and sound of my interlocutor were stuck 3. In the members the list (1-5) is small and you have to click a lot to them see everyone!

Learning content and exercises

I believe that the learning objectives were clearly defined

8 responses
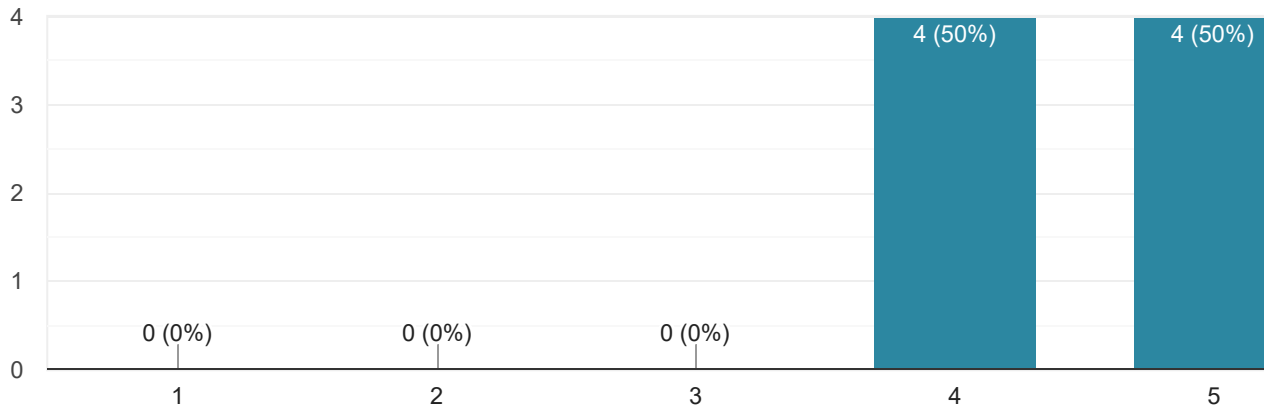

I think the exercises were understandably worded

8 responses
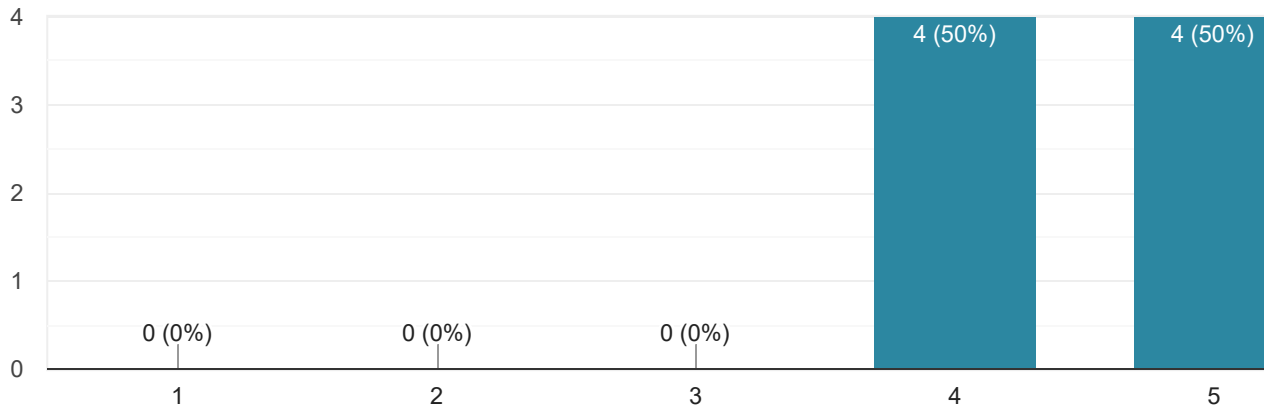

I think the level of difficulty of the exercises was appropriate

8 responses

During the exercises I could use the knowledge I have

8 responses
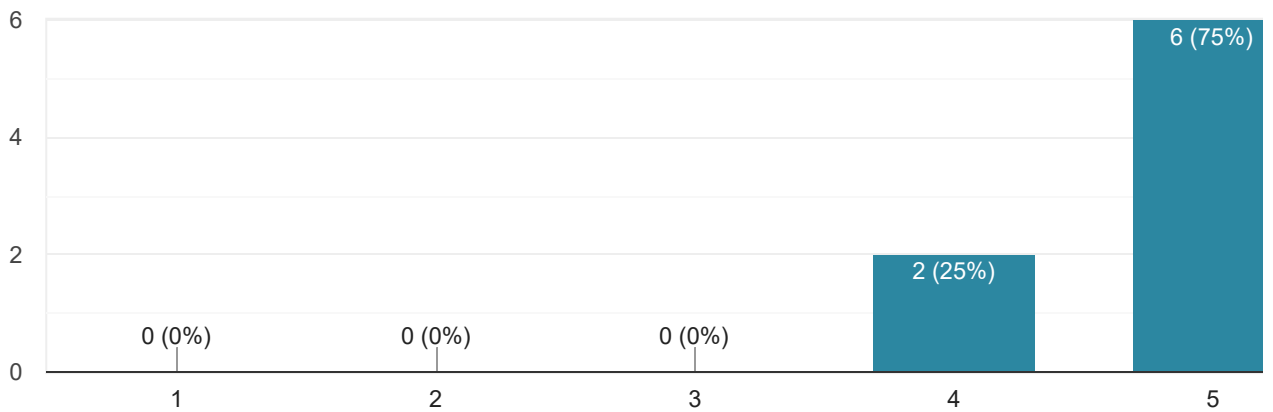

The exercises were a challenge for me
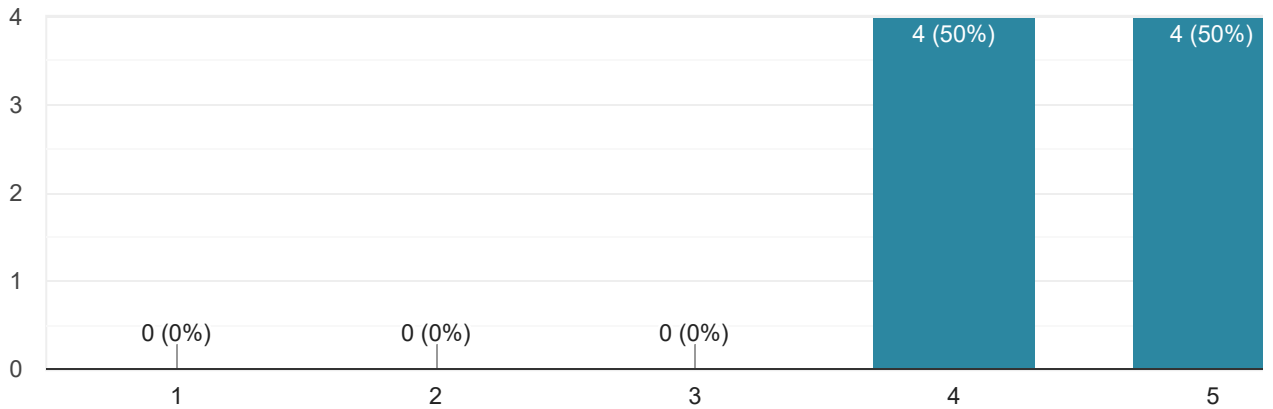

8 responses
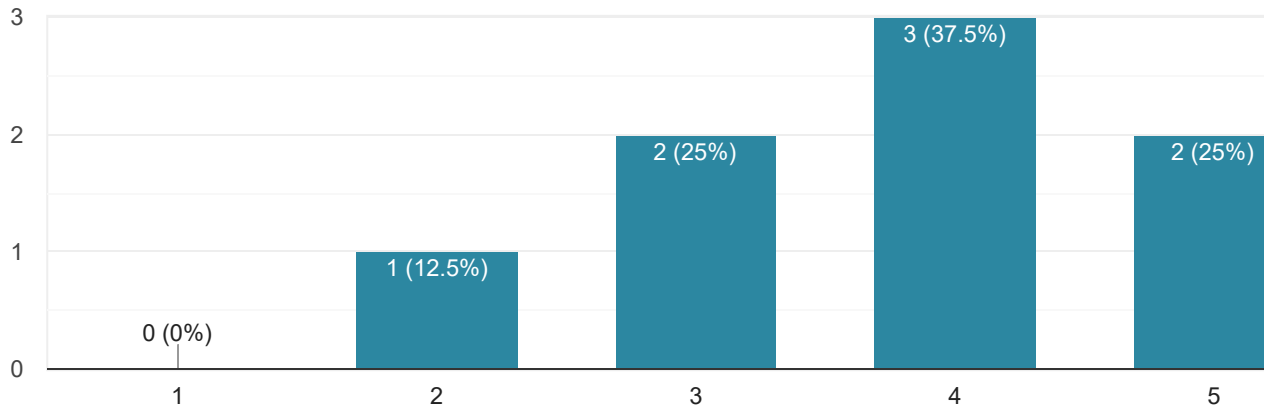

I think the exercise could be easily dealt with by working with my team

8 responses
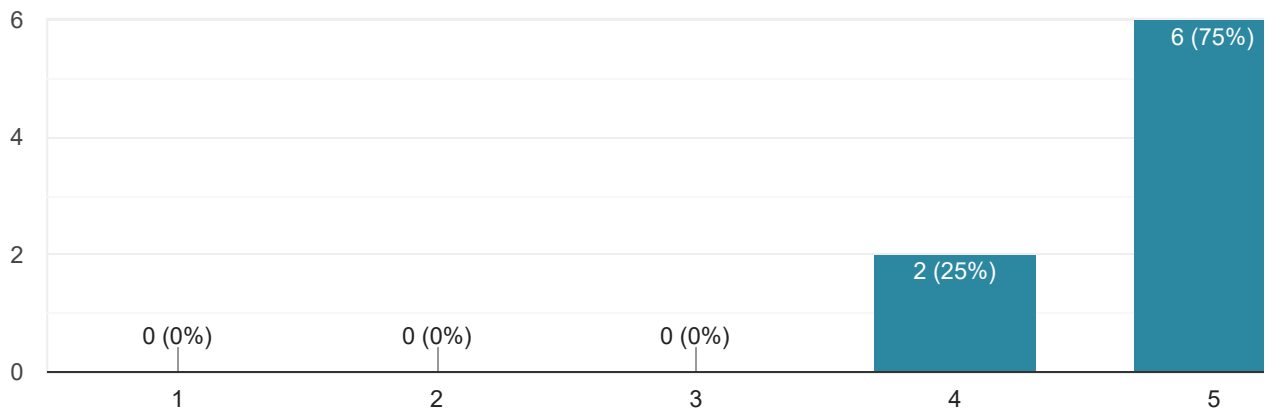

What specific suggestions do you have for improving the learning content on the digital learning platform in relation to e.g. with the format / type and appearance / look of digital content? {Please give as short answers as possible.)

4 responses

external links, articles and videos

I believe that the learning content was absolutely satisfactory.

Perhaps greater clarity in the wording for successful specialization in a learning goal.

Questions of different type and format for enrichment of ideas

Summary of your experience in the Career 4.0 digital learning platform

The Career 4.0 digital learning platform offers incentives for learning

8 responses
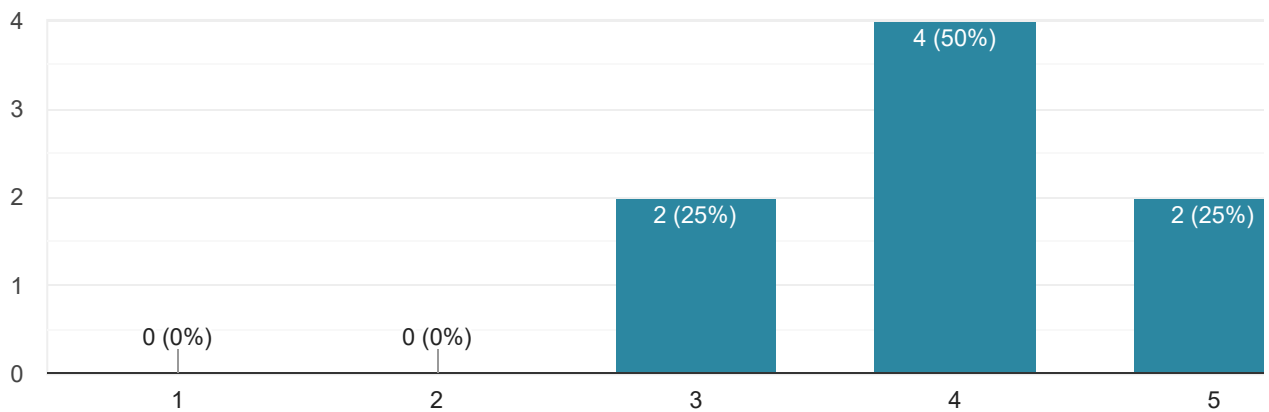

Career 4.0 digital learning platform promotes organized learning

8 responses
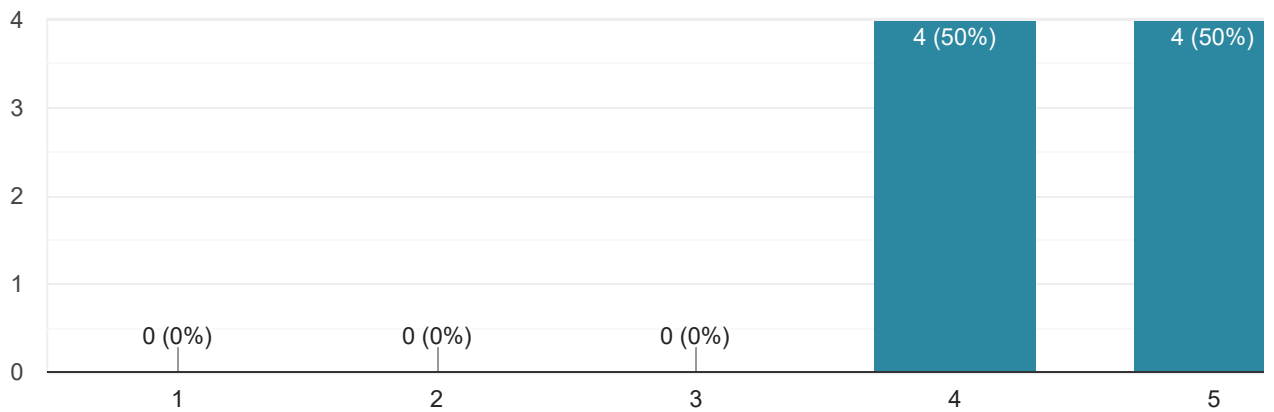

Career 4.0 digital learning platform improves learning outcomes

8 responses
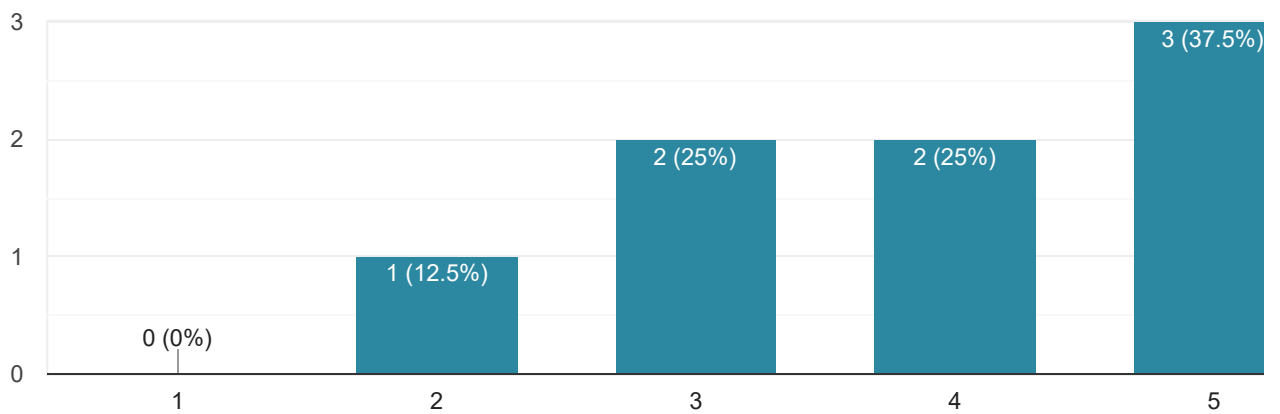

Career 4.0 digital learning platform improves the quality of learning

8 responses
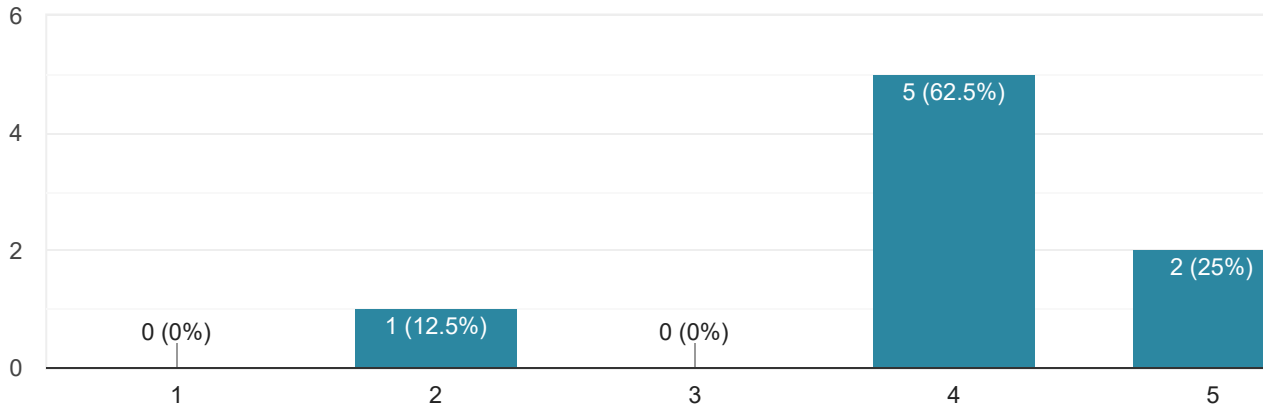

Career 4.0 digital learning platform facilitates Mentees / Guided communication within the workgroup

8 responses
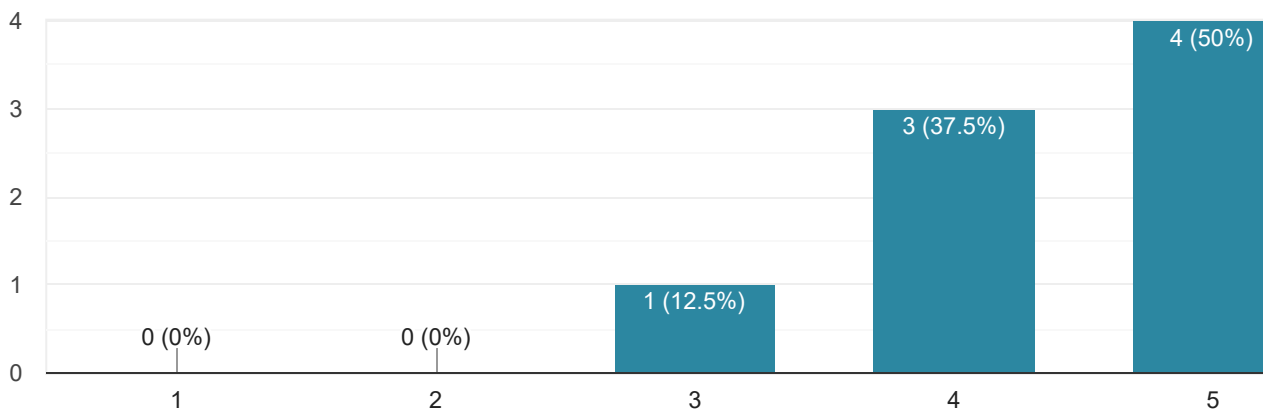

Career 4.0 Digital Learning Platform Improves Mentees / Guided Collaboration

8 responses
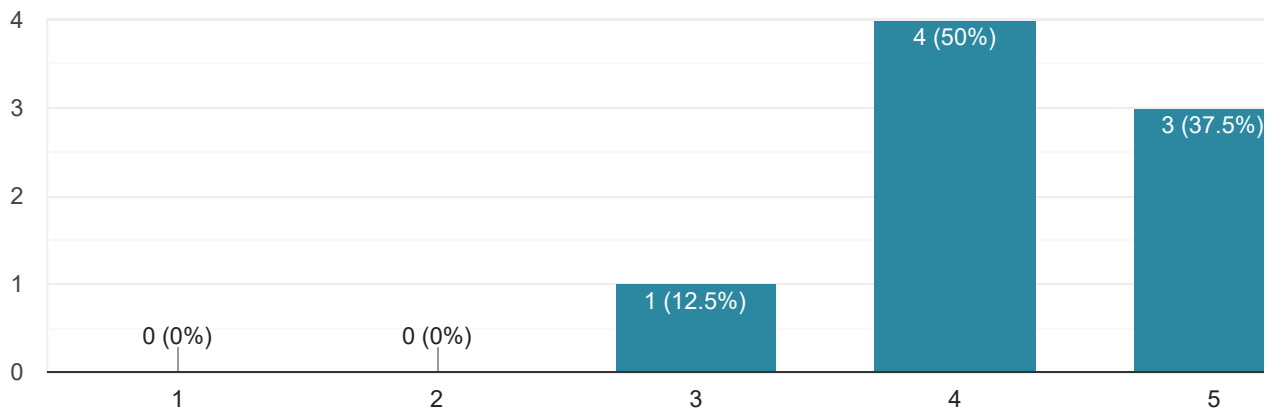

Career 4.0 Digital Learning Platform Improves Communication Between Mentees / Mentes and Their Mentors / Mentors
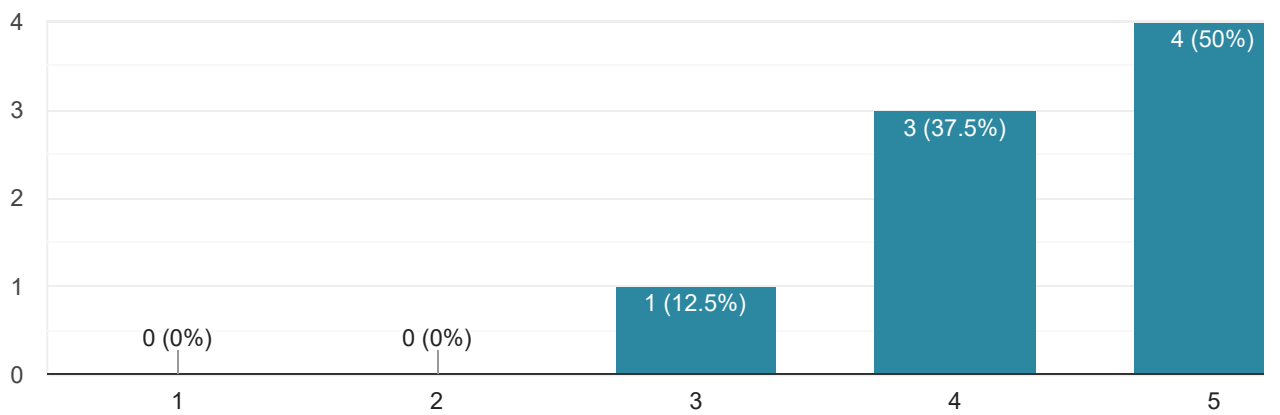

8 responses

Career 4.0 Digital Learning Platform Enhances Networking Between Mentees / Mentors and Their Mentors / Mentors
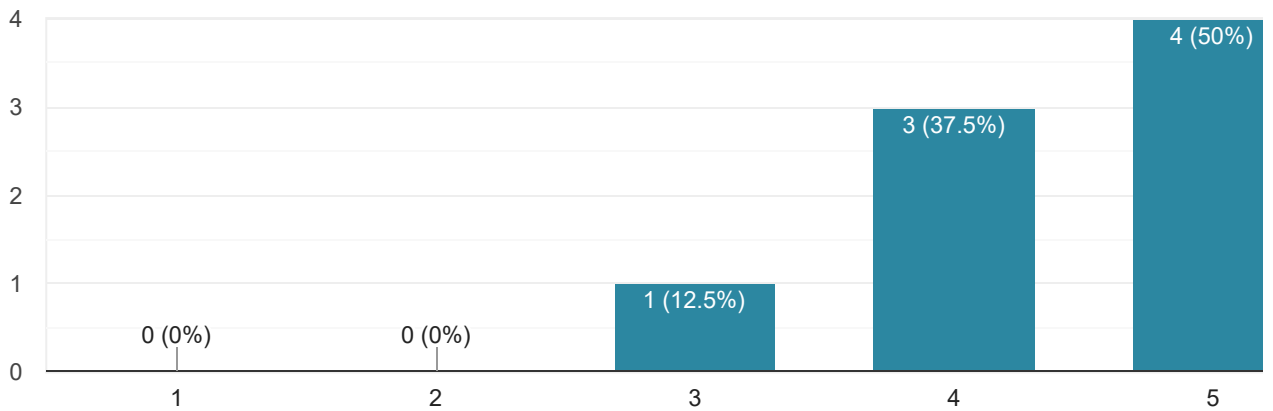

8 responses

Career 4.0 digital learning platform facilitates access to career guidance for socially disadvantaged Mentees / Guided

8 responses
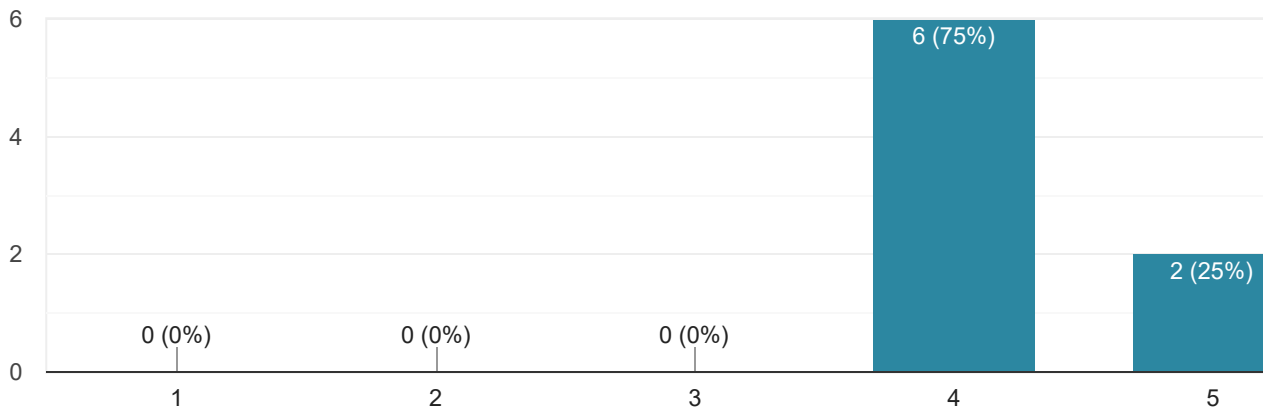

Personal experiences with digital learning

Digital texts (eg eBooks, PDF documents etc.)
